Wallpaper-

Choose your favorite wallpaper----

2.4 Cooling fan settings

The cooling fan can deal with and solve the abnormal operation caused by high temperature in summer and long-term use of the machine, such as restart, abnormal touch, abnormal function, etc....

2.5 Factory settings

When the system is unable to work or there is problems after user used the system, it can be restored to the factory settings. Once it's restored to factory settings, all the third-party software would be deleted, and the current system settings would be lost. For navigation software, just need to install corresponding APK. Please operate carefully.

Setup steps: Applications> Settings> General Settings> factory settings.

Function Operations

3.1 Carplay (Wired or wireless)

Use all your essential iPhone functions on the road, with Apple CarPlay. Drivers can use the radio screen and control keys, or Siri to easily and safely make calls, listen to music and radio stations, send and receive messages, use navigation map, and more, without ever taking your eyes off the road.

(1) Wireless Carplay --- Connection steps:

----->Connect Bluetooth

----->Click on “Car Link” icon
and wait for connection

(2) Carplay can also be connected via USB cable,

should be Apple original cord instead of 3rd party cord, otherwise you may have connection interruption.

Here are the compatible apps list for Apple iPhone: apple.com/iOS/Carplay; More apps may be added to compatible apps list in the future.

3.2 Android Auto (Wired)

Android Auto allows drivers to safely operate applications while driving. It supports Google maps, music, phone calls, etc. You can download applications for Android Auto in the Google Play store, such as what's app, Skype, etc., with rich functions.

For the android auto function , you need download an Android auto app on your Android phones (At least Android 5.0) .

Connection steps:

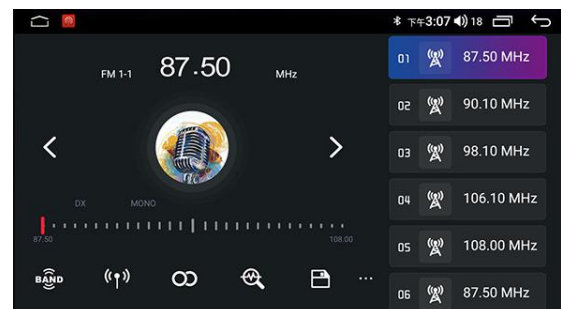

----->Connect the phone and radio with USB cable

----->Click on “Car Link” icon
and wait for connection

3.3 Radio

Press the radio button on panel or click the radio icon on the main menu to enter the radio interface, the specific functions and operation as below:

The functions of icons in the radio interface are described below:

FAQ

1.The radio is not fit for my car

The radio doesn't fit Polo 6r, Polo 6c, Beetle, Golf 7, Passat B8. The radio can not work with MQB Platform VW cars.

2. How to connect with the radio

When you receive the radio, please check the last page of wiring instructions. You can also scan the QR code below for youtube installation video: <https://youtu.be/jmA0Unpe7Gc>
:PICTURE

3.The radio can not turn off Or the radio make the car's battery get leakage

Solutions:

(1) Please check the CANBUS decoder connection, the CANBUS decoder must be connected.

(2) Please check the cable connection.

For high CANBUS cars, you need disconnect the two small black plugs, for low CANBUS cars, you need connect the two black plugs. You can see it in the picture, it shows the details.

But if you can not confirm it, you can try both way.

(3) Please setup the CANBUS.

Steps: Setting---Factory---Enter, password---3368---confirm. CANBUS type please choose “RZC”.

- For car brand and car model, you need choose according your car.
- If you can not find the model of your car in the list, you can also try to choose “PQ”
- If your car is low profile you can choose “low”
- If your car is high speed model, please choose “H.AMP”.

4.How to use the Android auto and Carplay function

Please turn to page 6, to see the details of function carplay and android auto.

5.Carplay function is unstable when driving

(1) As the radio works for a long time or is placed in high temperature conditions, the temperature of the internal electronic components of the machine is too high, which affects its stability. we recommended that you turn on the colling fan function.

(2) If you opened too many applications and then the cache is too much, the system will crash, so we suggest you close some applications and clear the system cache and application junk on time. Keep the machine clean.

6. What is the Easy connection function

Easy connection function is a total different function from Carplay and Android auto . We suggest you use the Android auto or Carplay function . These three function can not be used at the same time .

7. How to use the GPS/NAVI function

The radio can support GPS/NAVI function ,You need connect the **GPS antenna adapter** with the radio .

-For online map, you need connect the **WiFi Hotspot** from your phone,then turn on Google map App .

You can also use the GPS/NAVI function by the Apple Carplay or Android auto. These 2 functions' Navi depends on your phone. It just show the phone's screen on our radio's screen .

-For the online map, if you have insert a SIM card, you can just use your mobile data, please pay attention to the data consumption.

-For offline map, Please download the Google map or Waze advance (you also need internet to download the map)

8. There is no sound after you installed the radio

(1) Check the sound system in your car, the radio doesn't support Dynaudio and Fender sound system.

(2) Please check the cable connections.

9. How to use the 4G LTE function

- You need have a Micro SIM card, if your card is NANO, you need a tray.
- 4G data roaming has been activated
- Insert the SIM card into the SIM card slot and lock good.
- Connect the 4G antenna model and restart the radio.

10. The system of the radio freeze or break down

The system of the radio is Android. It more like our phone. If your download too many Apps or run too many programs on the background, it will make the system freeze or break down .

We suggest you to RESET the radio . here is a **RST** hole on the front panel .
